

## SAP Business ByDesign for Light Manufacturing via Cloud Factory

This package is oriented to simple manufacturing companies

SAP Business ByDesign is the ERP cloud solution en el n vul that allows the light anufacturing companies solve these challenges:

- Contract management with suppliers.
- Logistics supply chain management for warehouses and bin locations management.
- Basic quality management for raw material, semi-finished and finished goods.
- Production control and planning: MRP and order execution.
- Product traceability: Lots and serial numbers.
- Raw materials valuation based on purchasing cost.
- Consolidate information of all your departments in one single platform.
- Sales Order Management integrated with inventory and manufacturing.

All this allows you to manufacture the correct product, with the required quality and the established period to be able to provide a good service to the customers while ensuring the margins and results.

### The benefits of the onsite consultants at the price of remotes

The project is expected to be executed mainly remotely by our implementation factory, but with the local consultant travelling to the customer office to attend the most important inside activities such as: Kickoff, Testing and Go Live.

### The Cloud factory platform allows

- Rapid delivery in 120 days or less
- Repeatable and affordable
